

Carbon footprint 2023

GHG protocol method

A company's carbon footprint measures all the greenhouse gas emissions linked to its activity over a year, grouped by category. This tool makes it possible to measure a company's impact on the climate and to understand the causes. It is an essential step in effectively reducing emissions.

About the carbon footprint measure
Perimeter : scopes 1, 2 & 3

Economic carbon intensity

191

kgCO₂e / k€ of revenue

Of which, per k€ of revenue:

- 1.9 kgCO₂e on scope 1
- 2.6 kgCO₂e on scope 2
- 186 kgCO₂e on scope 3

Employee intensity

8.4

tCO₂e / employee

Of which, per employee: ?

- 47 kgCO₂e on scope 1
- 1.241 tCO₂e on scope 2
- 7.156 tCO₂e on scope 3
