

Carbon footprint 2023 (reviewed) GHG Protocol Standards

A company's carbon footprint measures all the greenhouse gas emissions linked to its activity over a year, grouped by category. This tool makes it possible to measure a company's impact on the climate and to understand the causes. It is an essential step in effectively reducing emissions.

About the carbon footprint measure
Perimeter : scopes 1, 2 & 3

Economic carbon intensity

1.1

tCO₂e / k€ of revenue

Of which, per k€ of revenue:

-  1.9 kgCO₂e on scope 1
-  2.6 kgCO₂e on scope 2
-  1.085 tCO₂e on scope 3

Employee intensity

8.4

tCO₂e / employee

Of which, per employee: 

-  47 kgCO₂e on scope 1
-  1.241 tCO₂e on scope 2
-  7.156 tCO₂e on scope 3

85,052.262 tCO₂e are not associated with Headquarter.
